we aim at excellence

---

compliance.

reporting.

strategy.

---

**corporate.responsibility**

## business case .

### why.

companies must comply with national and international regulations.

at the same time companies need transparent and sustainable leadership.

### simplicity.

compliance, sustainability strategy and reporting are three important pillars of coherent business strategy and development:

reporting basically informs your stakeholders about core compliance and sustainability performance.

compliance indicates sustainable business strategy.

### benefits.

- stakeholder-information
- communication
- image und reputation
- efficiency
- competitiveness
- market positioning
- risk management
- and more

## portfolio .

### compliance.

- development of corporate compliance systems to avoid risks of liability
- identification und analysis of compliance issues, such as data and privacy protection, business law, labor law, environmental law
- conception, editing of company guidelines on e.g. ethics, compliance codes, corporate governance codes etc.
- consulting services to internal compliance officers with regard to compliance issues and relevant legal aspects
- implementation of compliance systems as external compliance-officer in cooperation
- training of employees in compliance issues

### reporting.

- conception, editing of sustainability-, environmental-, csr- and corporate responsibility-reports
- texting of print- und online-reporting
- layout for print- und online-reporting
- conception, editing of employee-publications, guidelines and handbooks to sustainability, csr and compliance issues

### strategy.

- strategy development for corporate responsibility, corporate governance, sustainability performance
- organization and implementation of corporate responsibility-activities und projects
- development of sustainability management systems
- training and of employees, executives and other internal stakeholders
